Musterstadt
B.Sc. Business Administration
10/2017 to 09/2021

SKILLS

Data
SQL, dbt, PostgreSQL, Airflow, DuckDB

Programming
Python, pandas, Git, Docker

Methods
Data quality, master data, cost accounting

Languages
German (native), English (C1), Polish (B1)

EXPERIENCE

Musterwerk Maschinenbau GmbH — Leipzig
Data Engineer, Procurement and Warehouse — 04/2024 to Present

- Merged supplier master data from three ERP tenants into one table; duplicates down from 11% to under 1%.
- Replaced a two-day manual stock report with a tested dbt run that lands at 06:00 every Monday.
- Prepared the data release for the first AI pilot (quote review), with personal fields removed before handover.

SQL, Python, dbt, PostgreSQL, Airflow

Beispiel Logistik AG — Halle (Saale)
Working Student, Controlling — 10/2022 to 03/2024

- Recomputed freight cost per shipment from 40,000 invoice lines a month and found two mis-tariffed lanes.
- Replaced Excel macros with a documented Python script colleagues run themselves.

Python, pandas, Excel, Power BI

Musterwerk Maschinenbau GmbH — Leipzig
Working Student, Purchasing — 10/2021 to 09/2022

- Analysed 18 months of order history for lead times and flagged three parts with more than twelve weeks of lead time as a risk; two of them now have a second supplier.
- Moved quote requests to 60 suppliers from an open Excel list into a form with required fields, so every quote states the same quantity, deadline and freight terms.
- Prepared monthly purchasing volume per commodity group for the head of department, with the change on the prior year and one line of explanation per outlier.
- Collected framework contracts by end date in one list; four would have renewed automatically at old prices without a reminder.

Excel, SAP MM, SQL

Muster Handel GmbH — Halle (Saale)
Internship and Bachelor Thesis, Warehouse Logistics — 03/2021 to 08/2021

- Traced picking routes for 2,400 items from scanner data and moved the 120 most frequently picked items closer to dispatch.
- Cut the walking distance per order in the test zone by 18%, measured over four weeks before and four weeks after the change, with the same number of orders.
- Wrote the result up as the bachelor thesis and presented it to the warehouse team in one hour, with a floor plan and the numbers for every aisle.
- Handed the analysis over as a script the warehouse manager reruns every quarter with fresh scanner data.

Python, pandas, Excel

Hochschule Musterstadt — Musterstadt
Statistics Tutor — 10/2019 to 02/2021

- Ran a weekly exercise class for 30 first-semester students, online from the summer term 2020 and recorded for everyone who could not attend live.
- Rewrote the exercise sheets with complete worked solutions in R; forum questions per sheet dropped to about half.
- Checked the exam questions before the exam date and found two errors in the model answers that would otherwise have gone into the marking.
- Started office hours for students retaking the exam; nine of twelve participants passed on their second attempt.

R, LaTeX

Muster Handel GmbH — Halle (Saale)
Working Student, Sales Support — 04/2018 to 09/2019

- Entered incoming orders from email and fax into the ERP, about 40 orders a day.
- Answered customer questions on delivery dates from the warehouse stock.

Musterbau Werkzeuge GmbH — Musterstadt
Purchasing Clerk, Fixed Term — 07/2017 to 09/2017

- Kept on for three months after the apprenticeship, until the degree began.
- Placed orders for standard parts and checked delivery notes against invoices; reported eleven mismatches to accounting in three months.

Excel, DATEV

Musterbau Werkzeuge GmbH — Musterstadt
Apprenticeship, Industrial Clerk — 08/2014 to 06/2017

- Worked through purchasing, warehouse, sales, accounting and HR, three to six months each, with an own project in every department.
- Moved the monthly warehouse stocktake from paper lists to handheld scanners; counting now takes one day instead of two.
- In sales, wrote quotes for existing customers from the price list and merged the discount tiers into one table for the whole team.
- Passed the chamber of commerce exam with grade 1.7, then started a degree in business administration.

Excel, DATEV

Musterbau Werkzeuge GmbH — Musterstadt
Summer Job, Assembly — 07/2013 to 08/2013

- Worked six weeks on the final assembly of clamping tools, in two shifts, to the work plan and with a briefing at each of the four stations on the line.
- Filled in the test record for every finished tool and reported missing or wrongly delivered parts to the foreman before the line stopped.
- Then wrote the application for the apprenticeship at the same firm, with the foreman as the contact for the question from human resources.

PROJECTS

Supplier duplicate finder · Open notebook that groups similar supplier names by edit distance and explains every merge. 2025

Stock traffic light · One page per warehouse, three colours, one number. Replaces a 14-page PDF report. 2024
